

Omnipointe Energy provides Flat Rate pricing, as well as, Index pricing that mirrors the wholesale markets.

**The RESULT:
Substantial Savings on your energy bills . . . up to 20%!**

Omnipointe Energy partners with multiple utility companies (electric and natural gas) and provides cost savings directly to you. This means you could start saving more on your electric and natural gas bills based on your utility usage history and Omnipointe's Energy price indexing model.

How it Works

Omnipointe's utility experts will review your current utility bills to analyze your energy consumption and work with you to get the best future pricing.

Start Saving Today!

When you choose Omnipointe Energy, your electricity and natural gas will continue to be delivered from your local utility company, the only changes you will notice are the billing provider and the new lower price on current usage. Something this simple can make a big difference.

What Does Price Indexing Mean to You?

Price Indexing refers to a month-to-month monitoring of electric and natural gas pricing by a service provider. Generally, this indexed price is about 10% to 15% lower than the local utility company. Index rates are based upon market estimates.

With Omnipointe Energy it's easy to watch the savings add up!

The Omnipointe Energy benefits:

- No start-up fees.
- No changes or interruptions in your service.
- Substantial Savings of up to 15 - 20%
